Program**

Discover OVHcloud Connect (OCC)

Extend your corporate network to
OVHcloud data centres

Agenda

- 👉 OVHcloud a global network service provider
- 👉 Why private connectivity
- 👉 OVHcloud Connect
 - 👉 Our Partners
 - 👉 Use cases & Demo

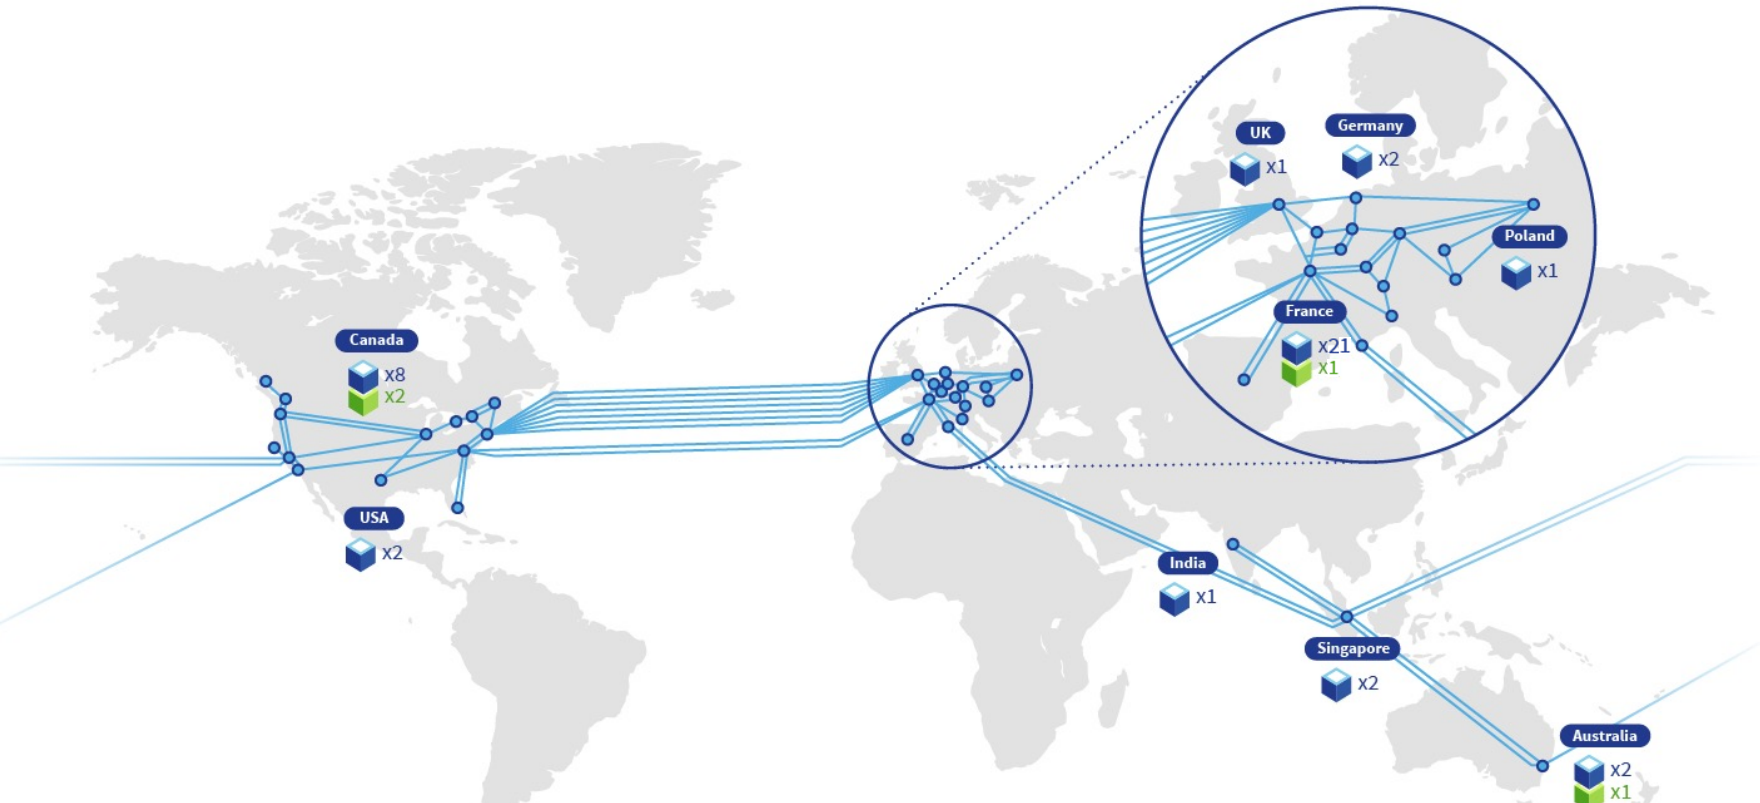

But first, some context....

Why the network, why now?

Network is a cornerstone of cloud services

OVHcloud a Global Network Service Provider

105 Tbps network capacity	44 datacenters	48 points of Presence	15,000 Km of dark fibers
-------------------------------------	--------------------------	---------------------------------	------------------------------------

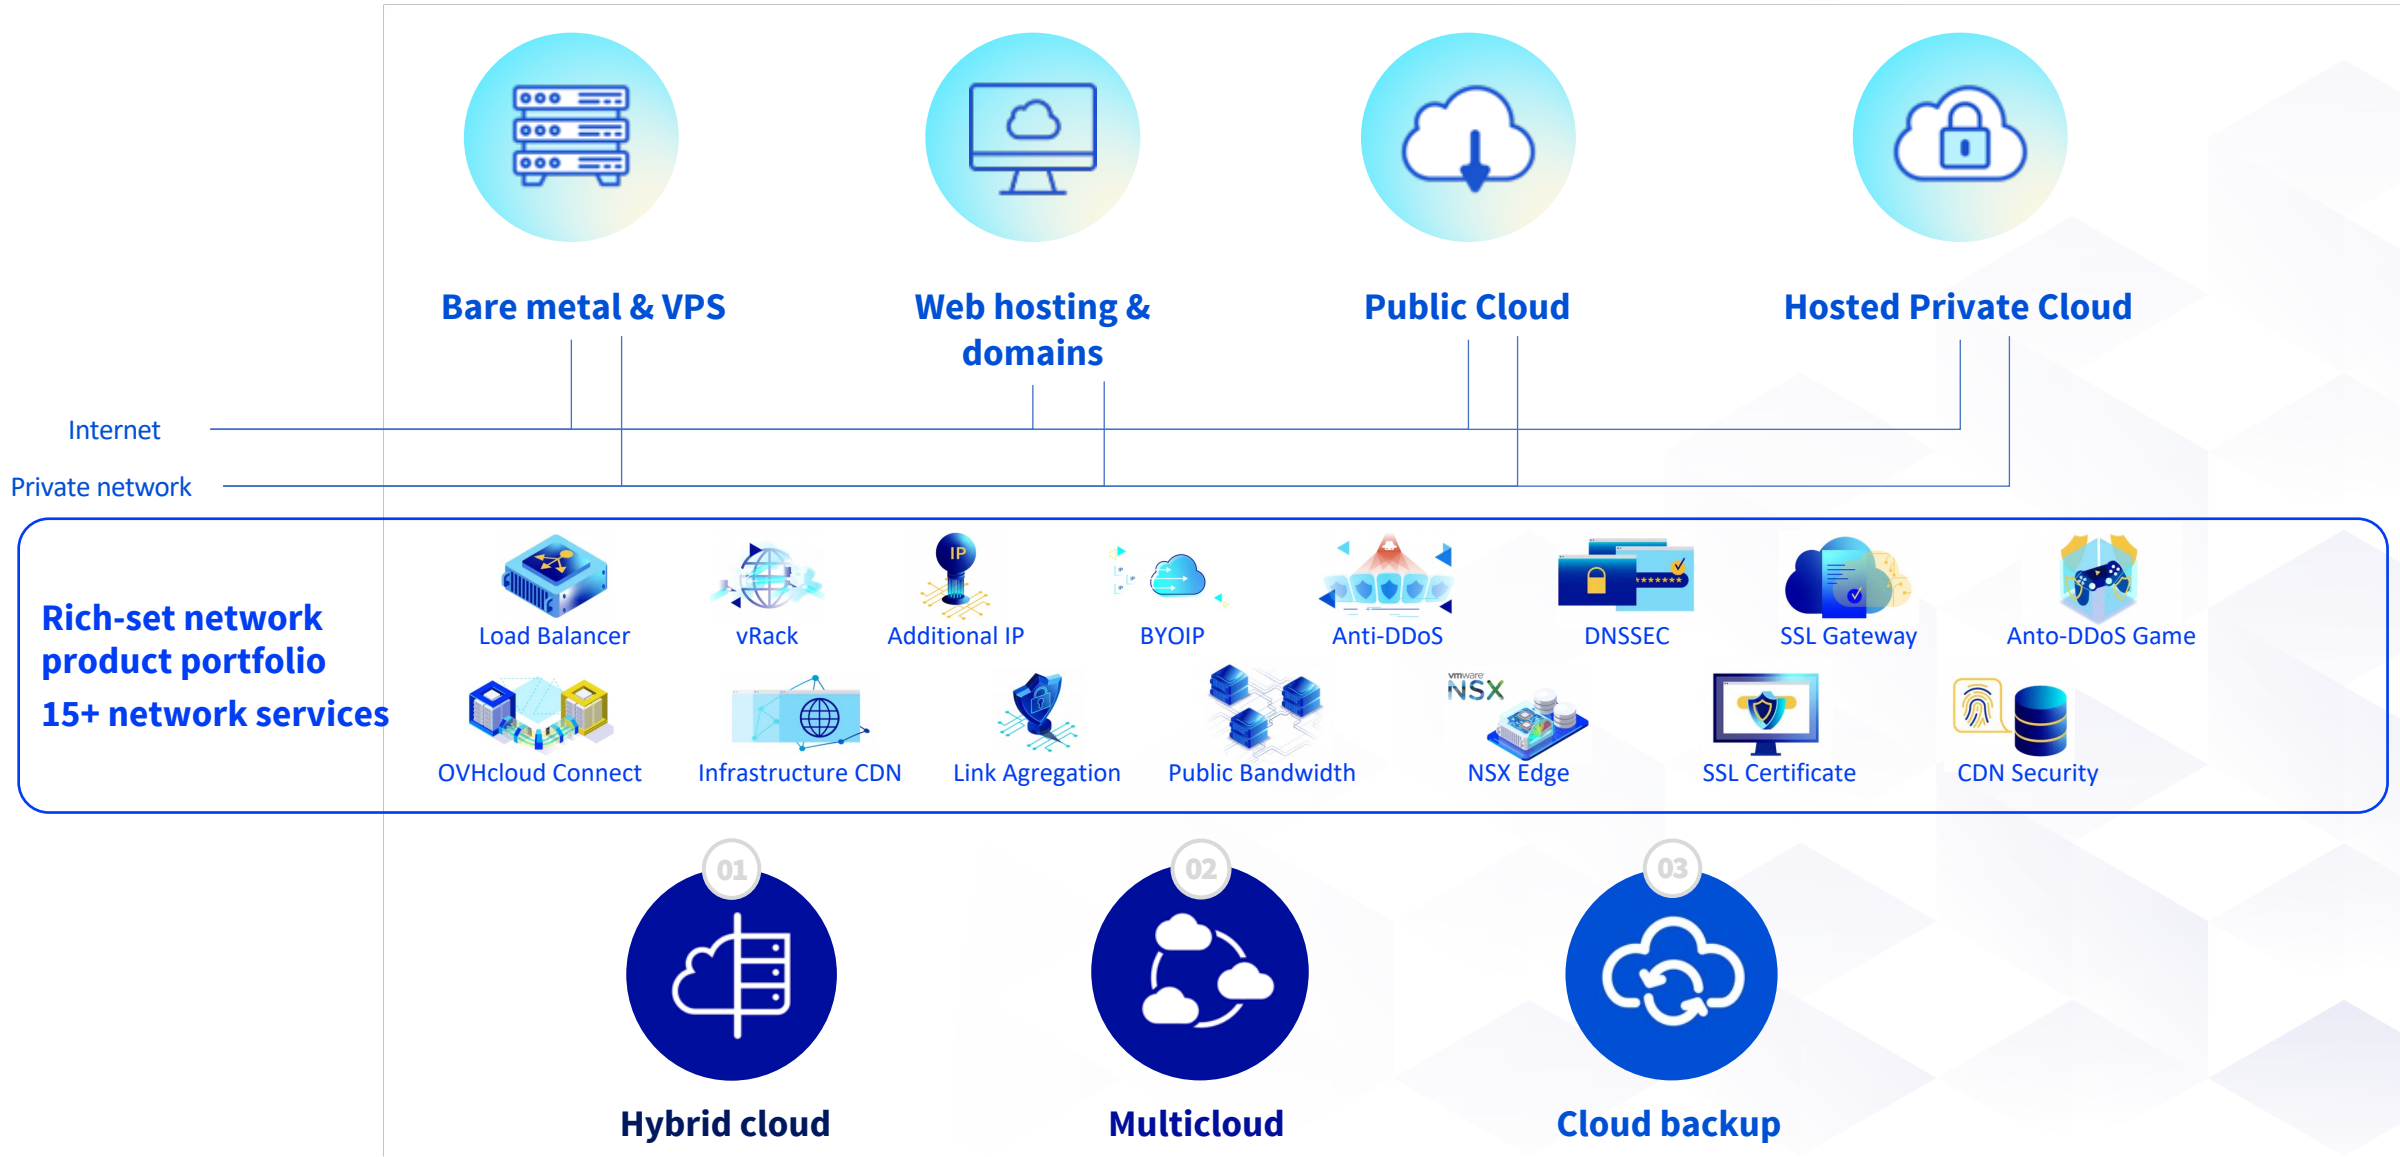

-  **Worldwide availability**
-  **Unmetered bandwidth**
-  **Low-latency, fast, reliable network**
-  **Quality attack protection**
-  **Secure interconnection from your site**
-  **Full work transparency**

Legend:  Active datacenters  Planned datacenters for 2023-2024  Point of presence  OVHcloud optical fiber network

1. A Point of Presence (POP) serves as the gateway through which customers connect to the internet and access their cloud resources.

Enhanced flexibility		✓

OVHcloud Connect Value Proposition

Global Reach, Multi-Cloud Agility, and High Availability

Hybrid-cloud Multi-cloud

- Extend your private network to your OVHcloud resources in the cloud.
- Enhance performance of critical applications by connecting your IT resources across various Cloud Service Providers.
- Wide range of bandwidth options from 200Mbps up to 10Gbps. Guaranteed & unmetered bandwidth

Global reach

- Benefit from the **shortest path** to your OVHcloud datacentre by leveraging the **dense POP coverage** of our partners.
- **Critical applications** benefit from the power of **low latency and guaranteed bandwidth**

Flexible & Scalable

- **Automated deployment** that is easy to use and even faster, especially with our partners.
- Harness **the power of Network-as-a-Service (NaaS)** to support your business application whatever the demanded throughput.
- In **just a few click** from your OVHcloud Control Panel you **deploy new connections** and say goodbye to bottleneck.

High Availability

- **High-availability with dual POP access** combined with **SLA up to 99.99%** to suit your critical applications.

OVHcloud Connect Our Partners

New

Console Connect

Console Connect is a platform for the Software Defined Interconnection® of applications and infrastructures. It allows users to self-provision private, high-performance connections among a global ecosystem of enterprises, networks, clouds, SaaS providers, IoT providers and applications providers. Console Connect is the only digital platform that is underpinned by one of the world's largest private networks, delivering higher levels of network performance, speed, and security. Accessible from 900+ data centres in 50+ countries worldwide, the platform is integrated with all major hyperscale cloud providers.

[Console Connect Product Page](#)

InterCloud

At InterCloud we believe cloud connectivity should be as simple, reliable and flexible as the public cloud itself. Our mission is to apply these principles to the migration & operation of business-critical workloads from corporate data centers to the Cloud. InterCloud services are neutral with regards to data center, WAN, Telecom, location and service providers. Because of this we select, manage and orchestrate the optimal connectivity solution for the application landscape of our customers. At InterCloud, we have created a Software-Defined Cloud Interconnect (SDCI) platform which enables traffic isolation to guarantee the end-to-end performance and security of your interconnections. This also allows usage-driven segmentation to optimize and enrich your links with advanced security, performance and analytics functions.

[Intercloud Product Page](#)

Megaport

Megaport is a leading global provider of resilient connection services. Through software-defined networking (SDN), the company's global platform enables customers to connect their network to other services quickly across the Megaport network. Services can be directly controlled by customers via mobile devices, their computers or our open API. Megaport connects more than 1,800 customers across more than 700 datacentres worldwide.

[Megaport Product Page](#)

Business Services

Orange

If you want to connect to your cloud provider securely, Business VPN Galerie offers a connection to OVHcloud that can be accessed via your private Orange Business VPN service network — and you can do this without having to go online. Your connection to the cloud benefits from service quality guarantees, and the security of your VPN network. With Galerie, you get access to the best cloud services on the market, and tech services from Orange. You can secure your cloud data with Orange CyberDefence, using the Flexible Security Platform for Galerie. Finally, you can control, optimise and access your data securely and transparently.

[Orange Product Page](#)

EQUINIX

Equinix

Equinix is the world's leader in digital infrastructure. Major players in the digital sector are using our platform to connect infrastructure elements that are essential for their growth. We enable our customers to enter markets, collaborate with partners and seize the opportunities they need to succeed. With Equinix, they can launch digital services quickly and take a more agile approach, all while offering added value and a better user experience to their own customers.

OVHcloud Connect

Use cases & demo

OVHcloud Connect

Versatile use cases for your hybrid-cloud and multi-cloud journey

1

Hybrid-cloud

Securely extend your datacenter in the cloud

2

Multi-cloud

Smoothen your multi-cloud journey

3

Backup and redundancy

Reliable connectivity that serves your business continuity

4

SaaS ecosystem

Accelerate your business-critical applications

OVHcloud Connect - Use Case - Hybrid cloud

Securely extend you datacentre in the cloud

Customer challenge

When considering moving application to the cloud or workload overwhelming, relying only on public connectivity may **put your application at risk** as a result of **poor network performance** and **cybersecurity risks**.

Solution

Set up a level 2 connection and **extend your campus LAN network to your OVHcloud's resources**.

Benefits

Improve user satisfaction as you benefit from smooth and flexible network extension of your campus network to your OVHcloud resources as a result of **automation and scalability**. Offering best-in-class **security** for your data.

OVHcloud Connect - Use Case - Multi cloud

Smoothen your multi-cloud journey

Customer challenge

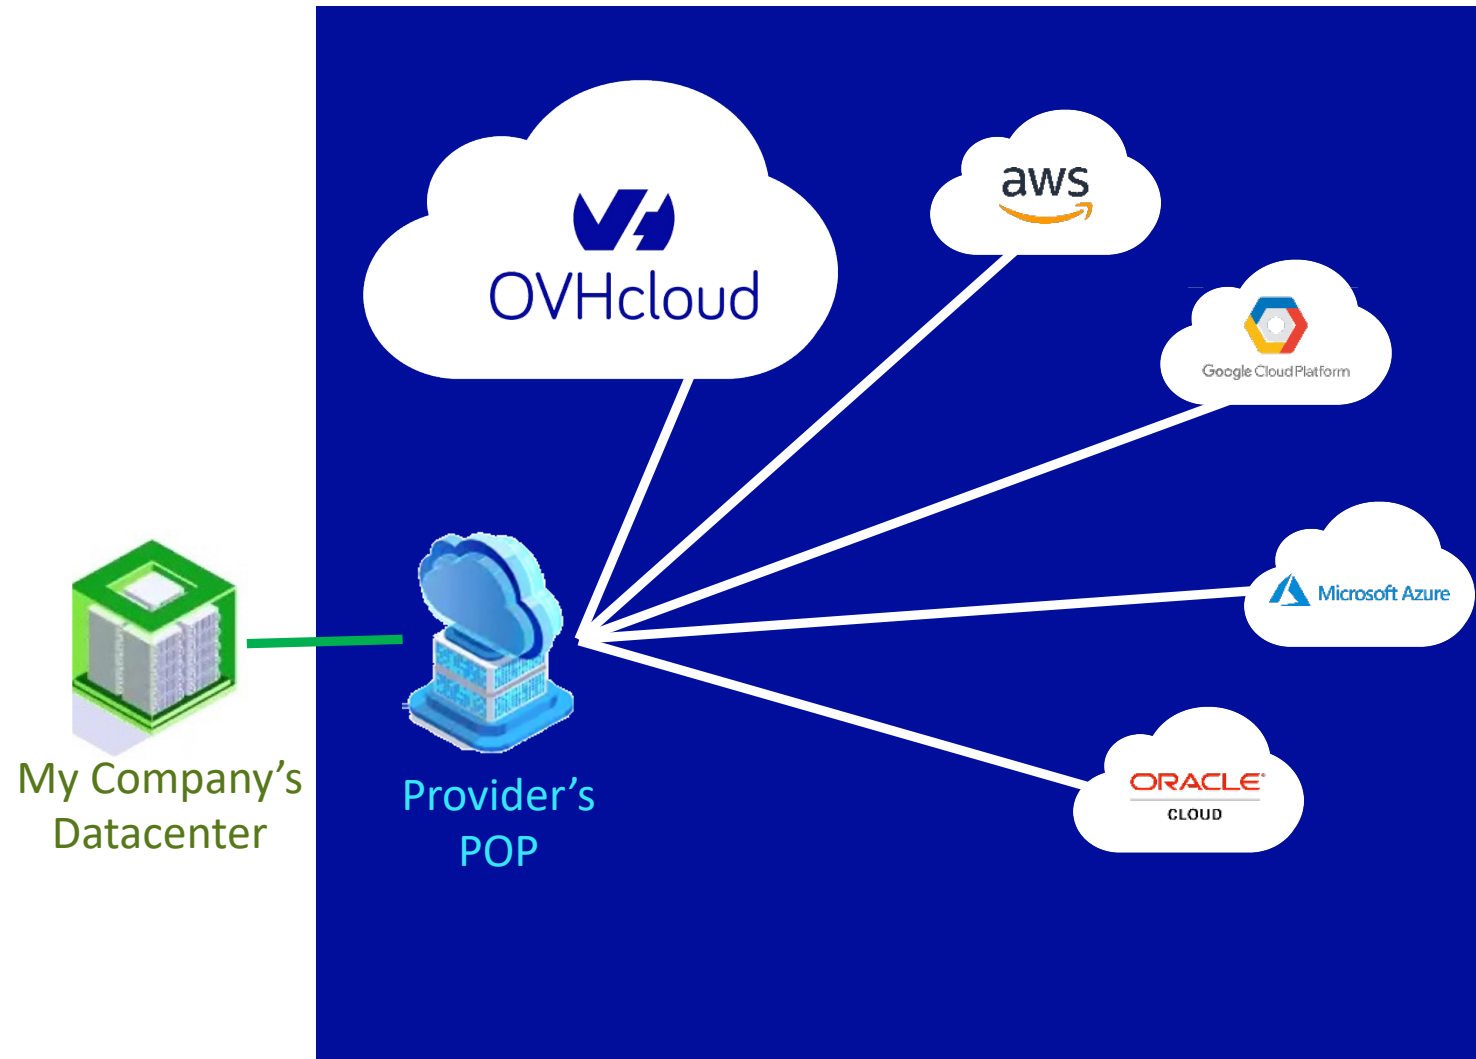

As you accelerate your multi-cloud strategy it comes with **greater complexity**, managing **multiple network connectivity**. **Cost control** and **performance** are a real challenge as you connect to more cloud providers.

Solution

Setup a **level 3 connection** with one of our Software-Defined Cloud Interconnect (SDCI) provider.

Benefits

By leveraging connectivity to one of our SDCI partner you benefit from a **cost effective** and **streamlined experienced** as a result of **simplified management** offered by those platform capable to **connect your digital ecosystem securely**.

OVHcloud Connect - Use Case - Backup and redundancy

Reliable connectivity that serves your business continuity

Customer challenge

Ensuring business continuity requires **reliable and scalable network connectivity** with stringent **control of your costs** whereas for backup and Disaster Recovery Plan (DRP), you need **flexibility** to face **surging demand for bandwidth**.

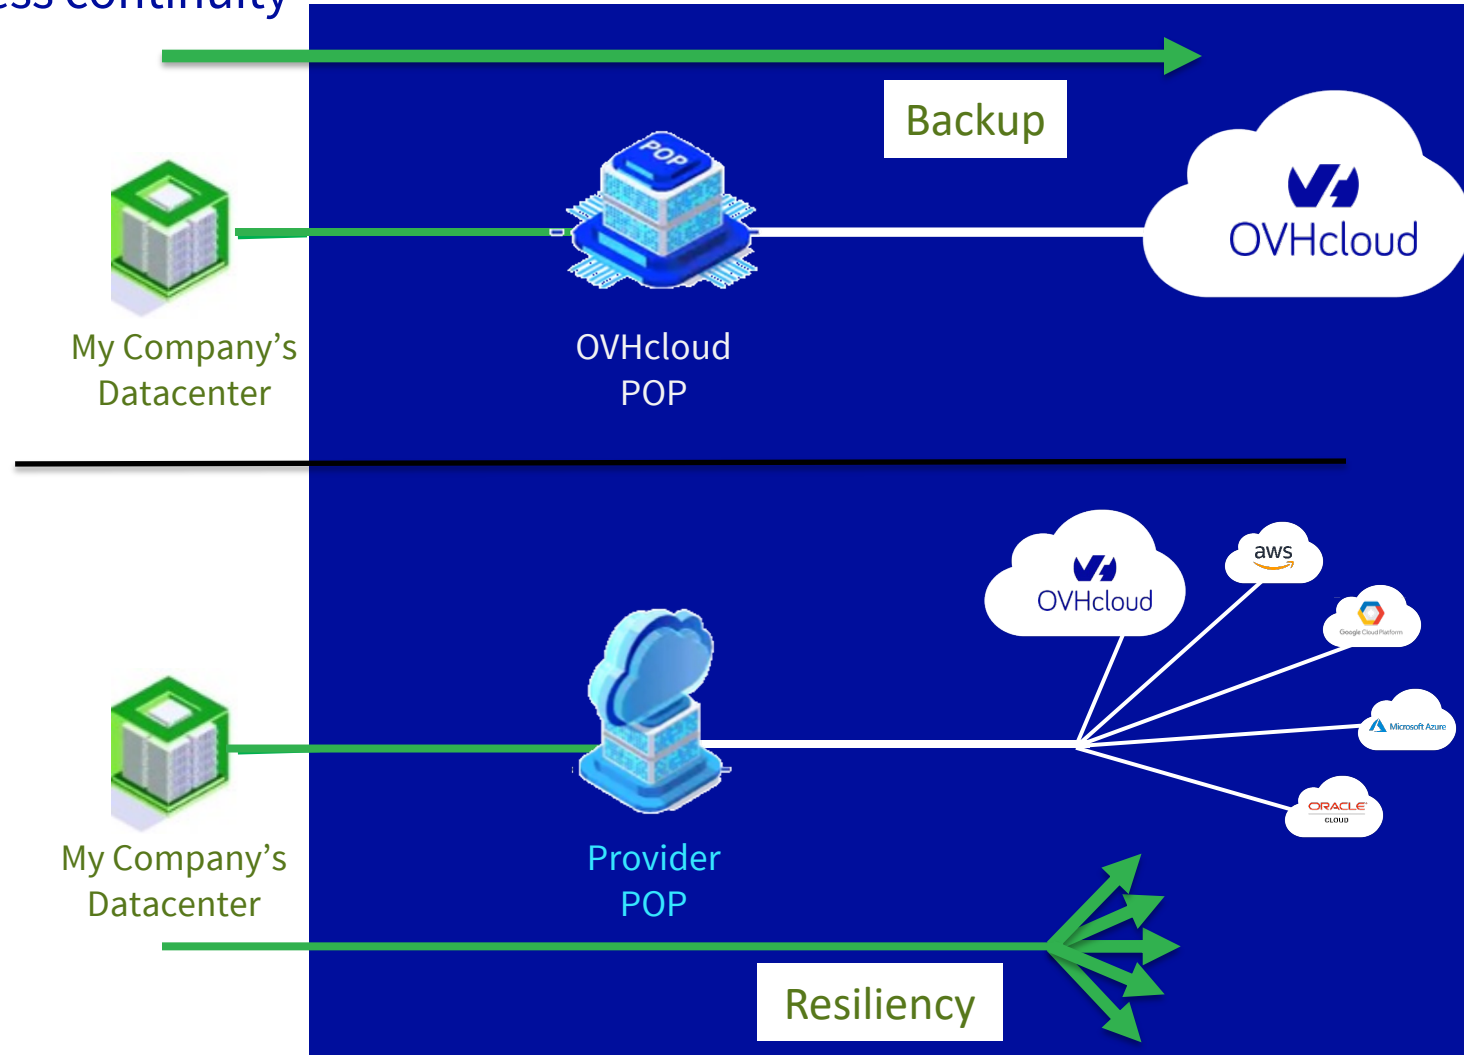

Solution

Leverage a **Level 2 connectivity** to give a reliable access to your backup in OVHcloud.

Or rely on **Level 3 connectivity** with one of our SDCI provider to build business continuity and DRP leveraging multi cloud environments to diversify your risk / enhance resilience.

Benefits

By leveraging our SDCI providers you benefit from a **most secure cost-effective solution** as a result of leveraging **automated platform** and **flexible bandwidth** options.

OVHcloud Connect - Use Case - SaaS ecosystem

Accelerate your business-critical applications

Customer challenge

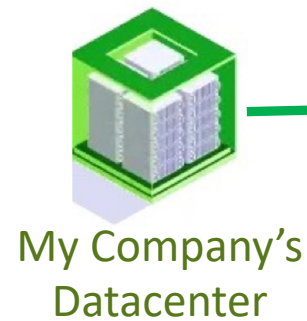

How to guarantee a best-in-class customer experience and comply with security regulation when moving your application to SaaS?

Solution

Rely on **Level 3 connectivity** with one of our SDCI provider and harness the power of SaaS for your application.

Benefits

Enhance the performance of your applications with private connectivity to the **SaaS provider of your choice**. And benefit from **secure** and **reliable connection** to multiple SaaS and cloud providers.

OVHcloud Connect - Professional Services

Our goal is to make life easier for our partners and customers.

Training and Consultation

Setup & configuration assistance

Professional Services OVH Networking Training and Consultation: 8 hours

Audience
 This offer is intended for customers:
 • Who want to be trained on the OVH networking offers and architectures
 • Who want guidance and assistance to implement one or more OVH networking solutions

Objectives
 • Understand OVH networking solutions
 • Assistance to architect on one or more OVH networking solutions
 • Assistance to build on one or more OVH networking solutions

Offer description
 • Professional Services Engineer will assist the customer in

- Training on OVH networking solutions such as
 - vRack
 - OCC
 - NSX
 - BYOIP
- Assistance to deploy on one or more OVH networking solutions

Topics Covered / Agenda
 • OVH Networking Solutions Overview

- vRack
- OCC
- NSX
- BYOIP

 • Specific Solution Training

- Technical deep-dive

 • Customer Networking Discovery

- Workshop on customers current use-case and future goals

 • Customer Networking Consultation

- Assistance to architect and build

OVHcloud

Pack Professional Services Assistance during OCC set up / 8 hours

Audience
 This offer is intended for customers:
 • Who intend to purchase OVHcloud Connect
 • Who would like assistance during the deployment
 • Who would like assistance to architect their OVHcloud infrastructure to integrate with OCC

Objectives
 • Understand the concepts of OCC
 • Define the End Goal OCC architecture design
 • Deploy OCC as per the design
 • Ensure connectivity as per the design

Plan & Duration
 Total Duration [8 hours]

	Discovery	Design	Deploy
OCC Discovery Workshop	Progress bar		
OCC Design Workshop		Progress bar	
OCC Assistance to Deploy			Progress bar

Topics Covered / Agenda
 • Discovery Workshop

- OCC Concepts

 • Design Workshop

- Current Architecture
- Future Architecture
 - L2 or L3
 - OCC Provider or OCC Direct
 - Routing design
 - vRack connectivity

 • Deploy

- OVH Manager PoP Configuration
- OVH Manager DC Configuration
- Customer-side cross-connection guidance*
- Customer-side DC routing guidance*
- Network connectivity testing

*OVH Professional Services will provide best-effort assistance with 3rd-Party network configuration but will not be responsible for configuration

OVHcloud **Pre-requisites:** Competency in Networking.

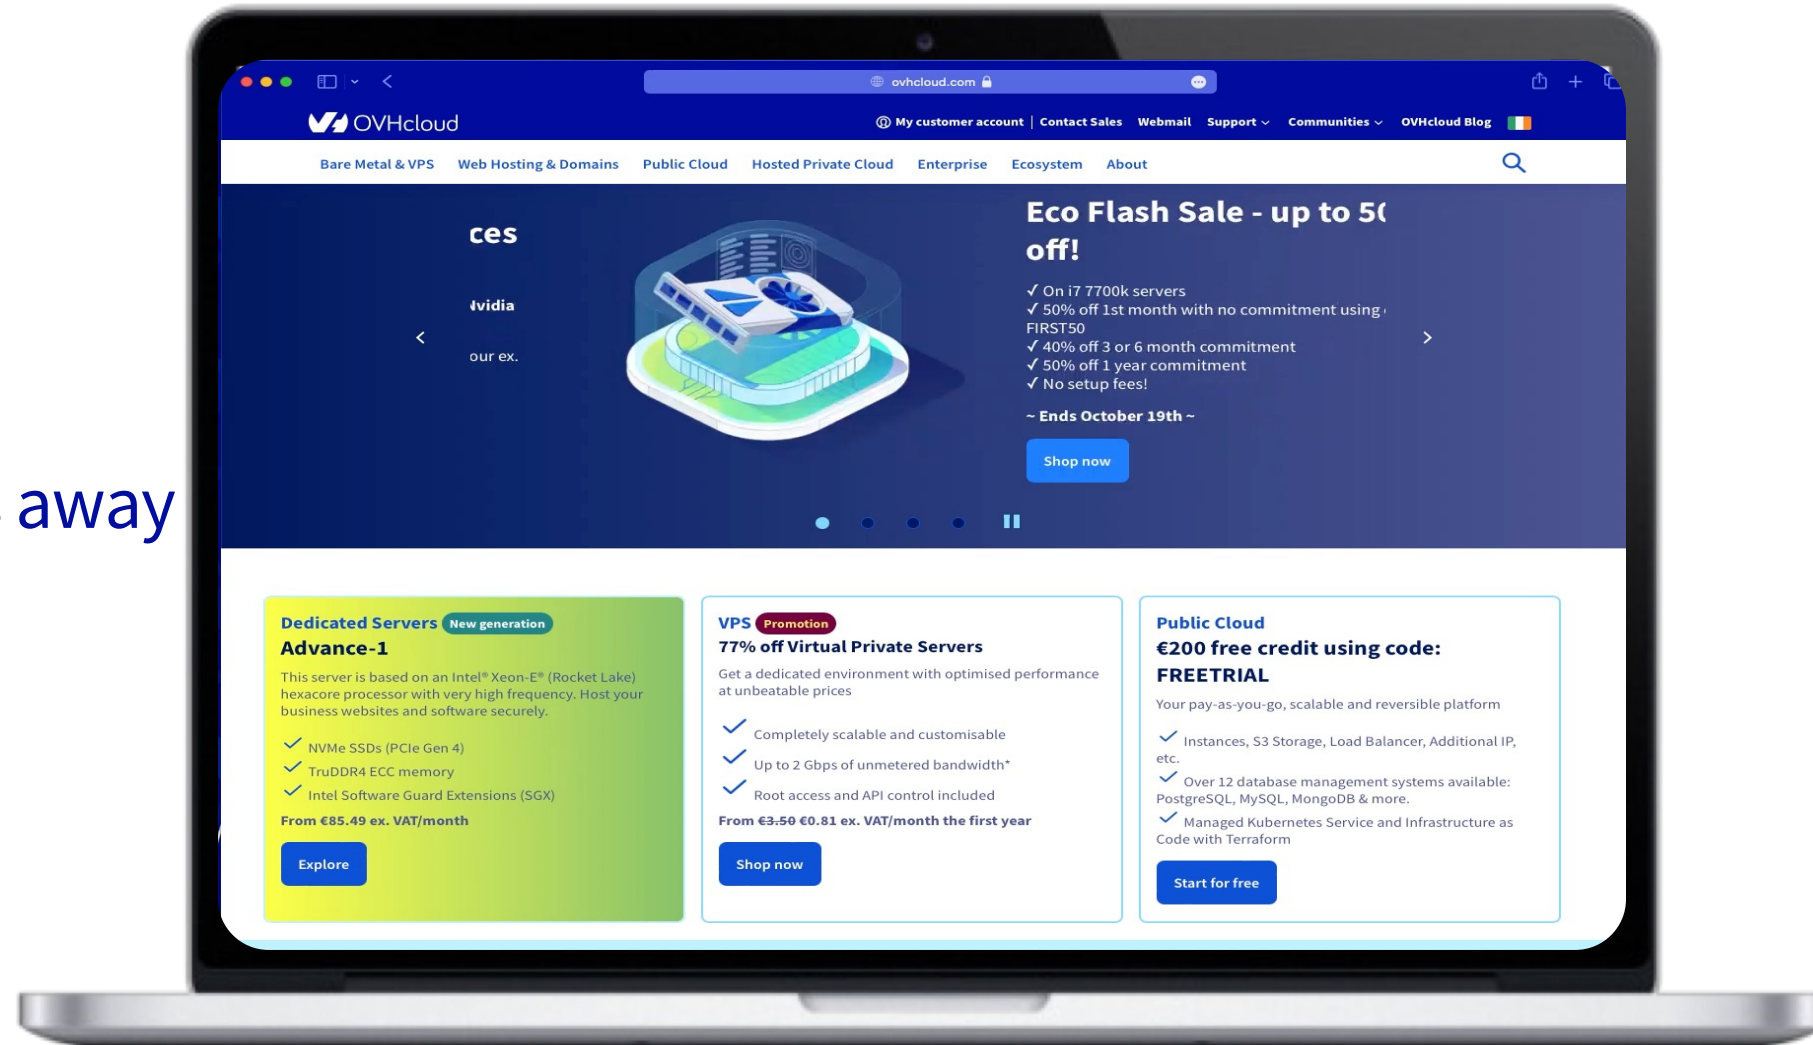

OVHcloud Connect Demo

OVHcloud Connect Direct - Customer journey

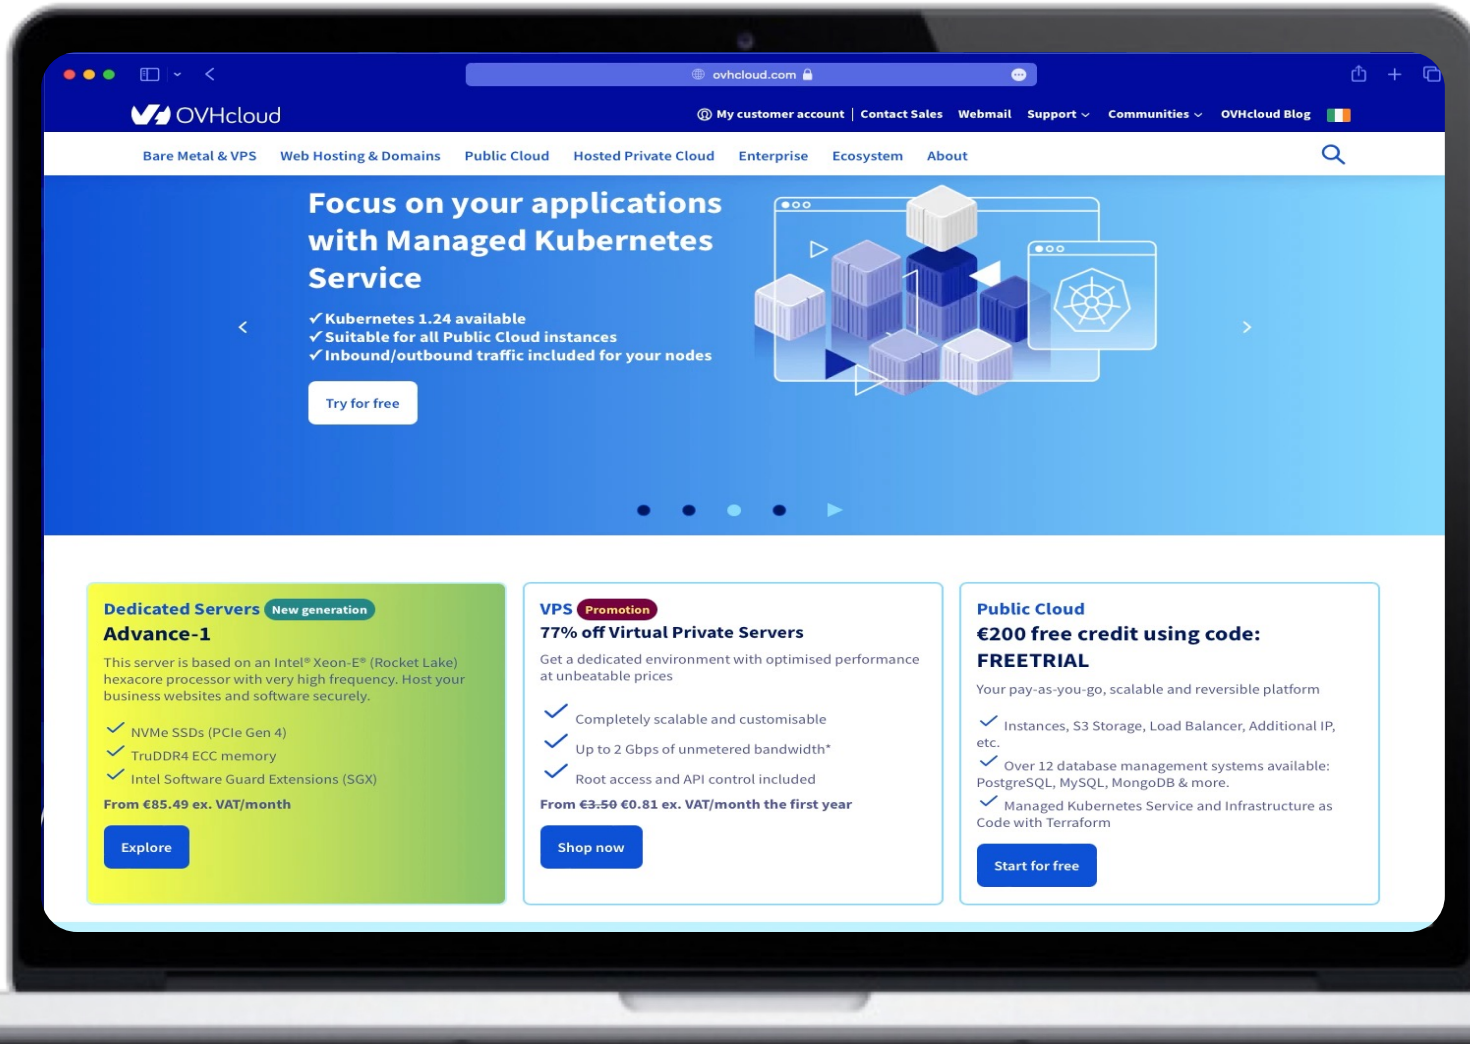

End-to-end digital order and setup that smoothen your roll-out

You are only 45 seconds away from your 1st order

OVHcloud Connect Provider - Customer journey - Step 1

End-to-end digital order and setup that smoothen your roll-out

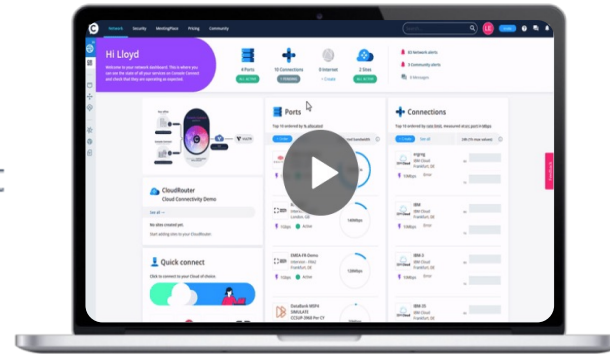

4 easy steps to establish your first private connection:

- ▶ Step 1: Subscribe to OVHcloud Connect Provider by selecting the provider of your choice.
- ▶ Step 2: Order your additional service from the chosen provider.
- ▶ Step 3: Type your service provider key.
- ▶ Step 4: Configure your interconnection.

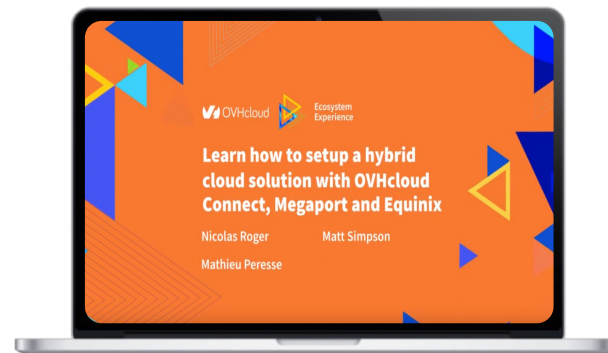

Step 1: you are only 49 seconds away from your 1st order

OVHcloud Connect Provider - Customer journey - Step 2

End-to-end digital order and setup that smoothen your roll-out

Step 2 with Console Connect:
end-to-end digital ordering in 4'20"
(click the video on the left)

Step 2 with Equinix or Megaport
(click the video on the left)

Wrap-up

Key take aways

 **Hybrid cloud Journey** ► OVHcloud Connect Direct

 **Multicloud journey** ► OVHcloud Connect Provider [Partners](#)

 **> 1,500 POPs available** with our extensive list from our Partners

 **Level 2 and Level 3 attachment** covering wide variety of use cases

 **State-of-the-art end-to-end digital ordering** and configuration experience

OVHcloud Connect - Resources

Your extensive OVHcloud network

With our OVHcloud Connect hybrid connection solution, you can form a secure, high-performance link between your company network and the OVHcloud vRack.

Data is transferred through our infrastructures via our Direct solution, and you get a dedicated connection with 1Gbps or 10Gbps bandwidth.

You can also choose our Provider offer, with one of our providers. With this solution, you get from 200 Mbps to 5Gbps bandwidth, and even more global coverage.

Hybrid and multi-cloud

A connection between your network and OVHcloud infrastructures, compatible with all of our cloud solutions. You get between 200Mbit/s and 10Gbit/s guaranteed bandwidth, and minimal latency on the public network (Internet).

Secure

We implement the latest security policies to ensure your data and applications are available and secure.

Simple and fast

Automated deployment... quicker - especially... quality of your services... directly via the OVHcloud... network (Internet).
